Education

University of California Irvine, School of Physical Sciences

Graduation: June 2029

Bachelor of Science in Applied Mathematics, Concentration in Data Science; Minor in Computer Science

GPA: 3.406

- Relevant Classes: Math 10 (Python for Data Science), Math 130A (Probability)

Leadership & Involvement

Hack at UCI | Logistical Organizer

Apr 2026 - Present

- Coordinate participant recruitment, mentor outreach, and event logistics for ZotHacks 2026, engaging students and helping promote an accessible, beginner-friendly introduction to coding and hackathons.
- Helped organize a day-long hackathon at VenusHacks, supporting participant engagement, event operations, and on-site coordination while helping create an approachable experience for students new to coding.

Edupark Tutor | Mathematics Tutor

Oct 2025 - Present

- Built relationships with students across 20+ one-on-one tutoring sessions, adapting lesson plans on the spot to align with diverse student learning styles and immediate classroom materials.
- Cultivated academic growth for both short-term and long-term students, providing comprehensive instruction across mathematics disciplines from introductory trigonometry and statistics to advanced AP Calculus BC.

Filipinx Undergraduate Scientist-Engineers | Treasury Intern

Jan 2026 - May 2026

- Selected as 1 of 13 interns from 40+ applicants to support the Treasurer in managing finances for two projects, a 350+ member paid membership program, fundraisers, and reimbursements.
- Oversaw \$5,000+ in retreat expenditures for two events, coordinating budgeting and payments for board/intern leadership and 70+ club members.

Kits and Kaboodles | President

Apr 2022 - May 2025

- Led student fundraising and community-service initiatives that raised \$1,000+ for hospital charities and produced 200+ care packages (kits) for hospitalized and unhoused community members.
- Secured an \$800 NASSP Student Service Grant by developing and presenting the organization's community-service initiative, helping expand its ability to support local communities.

Projects

Extern, NY Racing | Data Analyst

July 2026 - Sep 2026

- Analyzed publicly available NASCAR race data and sponsorship exposure metrics using Python, web scraping, and API integrations to estimate visibility ROI across a full Cup Series season.
- Built a weighted scoring model combining race performance, social media engagement, and media mentions to rank sponsorship opportunities by exposure efficiency.
- Delivered a data-driven sponsorship strategy recommendation report with publication-quality visualizations, identifying the highest-value sponsorship targets for NY Racing.

PinoyPort | Developer

Nov 2025 - May 2026

- Collaborated in an 11-person team (7 developers and 4 designers) over an academic year to develop a full web application, presented at FUSIONCon and won "Best User Experience" among 5 competing teams.
- Built responsive UI components from Figma designs using TypeScript, Tailwind CSS, Next.js and GitHub.
- Developed account features using Supabase and integrated Google Maps API for restaurant tracking.

Data@UCI Mentorship | Data Analyst

Jan 2026 - Mar 2026

- Analyzed a 2015 adult income dataset in a team of five over nine weeks to evaluate whether demographic and socioeconomic variables could predict income outcomes.
- Produced and presented a research presentation summarizing findings, earning First Runner-Up for Best Overall Project among 7 competing teams under mentorship from a UCSD Data Science graduate student.

Skills

Technical: Python, SQL, Tableau, PowerBI, Excel, Google Analytics, Microsoft Powerpoint, Git, Github
Typescript/Javascript, TailwindCSS, Next.js, Supabase, Firebase, Google Maps APIs, Matlab

Personal: Adobe Premiere Pro, Capcut, Content Creation (Youtube, Twitch, Tiktok, Instagram)
